Nevada has one of the highest rates of adult problem gambling in the United States. (6%)

Between 10% and 15% of people with substance use disorders may also have a gambling problem.

As many as 20% of problem gamblers contemplate or attempt suicide, compared to only 5% of the general population.

Problem gambling is a treatable disorder and people can, and do, recover!

Concerned about yourself or someone else's gambling?

Call the number below or visit us online for information and assistance.
